

CS335: Compiler Design

Milestone 1

Rishabh Bhutra - 170569

Pranav Kumar Mangal - 170488

Siddharth - 170696

25 Feb 2020

Steps To Run :

1. Execute make.
2. It creates executable myASTGenerator.
3. Execute: `./myASTGenerator --input=filename --out=filename`. (Replace filenames by desired input and output files)
4. It creates output file of the given filename. (make sure filename has extension .dot)
5. Execute: `./myASTGenerator --help` for help.

Software Used :

1. Flex (For lexer)
2. Yacc (For Parser)
3. makefile
2. Graphviz (For visualizing dot files)
